

CHR 2019-2020 Workplan

Membership: Added Rick Bennett, USFWS

Calls: Anticipate calls in August 2019 and February 2020

Activity leads: Working to designate leads and involve multiple members in activity work

Living Shorelines focus: Scope & number of activities limited due to member involvement with Living Shorelines activities and NOAA CRG award with TNC

1.1 Committee Communications:

- Building connections between local science/research groups and coastal management needs.
 - USGS Erosion forecasting research

MA CZM lead

1.2 Organize roundtable or working session on emerging issues:

- Retreat

NOAA OCM

- Probabilistic modeling for SLR projections and developing guidance

NHCP (pending)

1.3 Develop regional funding proposals.

- Assessment of innovative approaches to building coastal resilience
- Continue a small grants program
- Workshop on regional (multi-community) approaches to climate adaptation

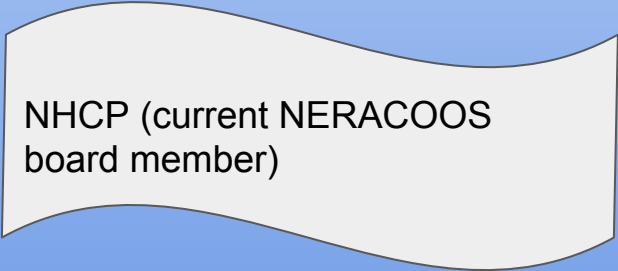

Please add or comment on current ideas!

2.1 Support regional efforts to advance green infrastructure and living shoreline management approaches.

- Support for NOAA Coastal Resilience Grant with TNC through 2020, including monitoring protocols and lessons learned.
- Continue to foster a community of practice around living shorelines and coastal green infrastructure.

CHR-2.2 Leverage NERACOOS data, products, and services for coastal inundation observations and forecasting.

- Continue to identify opportunities for connecting coastal management data needs with capabilities and assets of regional observing system.

NHCP (current NERACOOS
board member)
