

Potential New Projects for IJA Funding 2025-2027

COASTAL HAZARDS RESILIENCE COMMITTEE	NROC guidance and coordination	NROC staff capacity	Funding for small sub-contract	Funding for large or multiple sub-contracts
Water Level Sensor Monitoring in New England				
1.1 Regional coordination on existing and funded water level sensor projects				
1.2 Development of requirements and data products from the water level monitoring network for specific management applications.			\$	
1.3 Deployment of additional water level sensors in priority locations; development or support for mapping/web tools				\$ \$

Potential New Projects for IJA Funding 2025-2027

COASTAL HAZARDS RESILIENCE COMMITTEE	NROC guidance and coordination	NROC staff capacity	Funding for small sub-contract	Funding for large or multiple sub-contracts
Responding to Sea Level Rise				
1.4 Promoting dialogue and advancing knowledge on strategies for responding to sea level rise				
Advancing Living Shorelines				
1.5 Advancing nature-based infrastructure and living shorelines management approaches			\$	

Potential New Projects for IJA Funding 2025-2027

COASTAL HAZARDS RESILIENCE COMMITTEE	NROC guidance and coordination	NROC staff capacity	Funding for small sub-contract	Funding for large or multiple sub-contracts
Outreach, Engagement, and Collaboration				
1.6 Expand outreach, collaboration, and coordination with Sea Grant programs to advance coastal hazard resilience			\$	
1.7 Expand engagement with Tribes; expand or develop new CHR Committee initiatives to reflect priorities identified by Tribes			\$	
1.8 Partner with USACE to expand outreach and engagement to advance beneficial reuse of sediments				

Potential New Projects for IJA Funding 2025-2027

We welcome your input!

How else can NROC CHRC best ‘fill the gaps’ for advancing regional knowledge, tools, strategies, and approaches for building coastal resilience in New England?

Which priority coastal resilience topics and issues are most appropriate for CHRC roundtable discussions?
